PERSONAL PROJECTS

Ultimate Hello World (C# / .NET 6 — Console App)

- Console Hello World app which includes concepts such as DRY, SOLID, Logging, Dependency Injection, Localization, and Unit Testing. Feature(s): console output "Hello World" in specified language (e.g. EN, ES, etc.)

Calculator App (C# / .NET)

- Basic app using Windows Forms. Simple arithmetic functionality.

Class Project: Interactive World Map (AngularJS + World Bank API)

- The world map SVG was made interactive, enabling a hover effect for each country. An API service was created using the HTTPClient to make HTTP calls to the World Bank API, retrieving information such as country names, capitals, etc. When a country is hovered over, a card on the side displays the relevant data for that country.

My Weather (React.JS + OpenWeatherMap API)

- Basic weather application built with React.js, retrieving up-to-date information from OpenWeatherMap API.

Portfolio Website (React.JS)

- Single-page site to demonstrate my portfolio and knowledge in the field of Software Engineering.
